

CHEEVC Ltd has been awarded a SMART: Scotland – Development – award from Scottish Enterprise, worth £90,000. The SMART: Scotland award is a significant part of the overall project investment of £250,000.

The SMART: Scotland project will support the company's research activities focused on developing a high reliability smart battery system which is under development and will take 10 months to complete. The grant award will enable the company to invest in developing a new high technology product of great commercial value in a market sector worth billions of dollars. The solution from CHEEVC presents exciting new opportunities to increase battery pack life expectancy and enhanced product safety. This R&D support will enable CHEEVC Ltd to continue to develop its leading edge technology and will help to build the profile of Scotland as a major player in the renewable energy sector for translating outstanding research into the commercial sphere.
